### **Accounting Software sevDesk: Offenburg Startup is now 1&1's Technology Partner**

- **SEVENIT GmbH, based in Offenburg, provides the software basis for the new "1&1 Online Accounting" for small and medium-sized companies**
- **§ Software for digital invoicing and accounting now available online in major European countries**

*Offenburg, 9th June 2017* – Offenburg startup SEVENIT has been selected by the Karlsruhe internet provider 1&1 Internet SE as technology partner for the new business customer product "1&1 Online Accounting". Using the established accounting software "sevDesk", small companies can now handle their revenue and expenditure, financial status, and customer management, as well as communication with their tax consultant and the taxman, as part of their 1&1 package. 1&1 is the first web host in Europe to offer this type of software-as-a-service solution for accounting. As of 9th June 2017, it is available not only in Germany, but also in the UK, Spain, and France.

"For us, the technology partnership with 1&1 is great confirmation of the successful path we have taken in the development of our accounting software," says Fabian Silberer, one of the founders and managing directors of SEVENIT. The cloud solution sevDesk went online for the first time at the beginning of 2014, and in the same year was awarded the "Best of 2014" Innovation Prize by Initiative Mittelstand. Since then, sevDesk has become available in eight countries, with monthly sales increasing by around 10 to 15 percent. At SEVENIT in Offenburg, a team of 30 is working on the further development of the software and its integration into partner programmes.

In cooperation with 1&1, "1&1 Online Accounting" is now available to small and medium-sized companies. 1&1 is a leading internet provider with 17.16 million customer contracts. Its range of products is aimed at consumers, freelancers, and traders, and ranges from webhosting to fast DSL access with telephony, mobile connections, and personal information management via the internet.

**About sevDesk:**

sevDesk is a smart invoicing and accounting software with which self-employed people and small companies can do all their accounting online easily and cheaply. Using artificial intelligence, sevDesk accounting software allows you to scan and automatically manage all vouchers digitally via an app, whether for single-entry or double-entry accounting. The revenue surplus can be added entirely without a tax consultant. When adding balance sheets, working with a tax consultant is child's play thanks to DATEV export and the direct interface. The cloud-based invoicing programme makes it easy to create and manage proposals and invoices with just 3 clicks, and is available at any time, including for dunning.

sevDesk is developed and sold by SEVENIT GmbH in Offenburg, which, with its young team, provides secure and reliable support. As a member of the Federal Association of IT-SME e.V., SEVENIT hosts all data on German servers and is committed to 100% quality of service.
